DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- bpw
n/pa/03*
- I. Claims 1-7 and 17-3⁶~~7~~, drawn to an electromagnet structure, classified in class 335, subclass 296+.
 - II. Claims 8-16, drawn to a gas valve with an electromagnetic controller, classified in class 137, subclass 65.

The inventions are distinct, each from the other because of the following reasons: Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group I and Group are unrelated because they have different modes of operation, and different functions as claimed. Note the invention of Group II depicts an electromagnetic controller for controlling a gas valve that is not required for the electromagnet structure of Group I. Therefore, this supports the different modes of operation and different functions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3753

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was not made to request an oral election to the above restriction requirement. Applicant(s) is/are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George L. Walton whose telephone number is (703) 308-2596.
